

62022
2 Ton Capacity

**ROCKET LIFT TECHNOLOGY
UP TO 3 TIMES FASTER
IN LIFTING UNDER LOAD**

Industrial Grade of Castors
for Easier Transportation

Foam Handle for
Vehicle Body
Protection

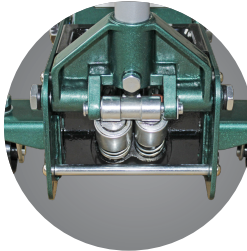

Heavy Duty Chassis for
Increased Strength and
Durability

Reinforced and Heavy
Duty Lift Arm Axle

Built-in by-pass system
for Cylinder Protection

Universal Joint Mechanism

Double Pump Piston to Decrease
Required Pumps Needed to Reach Chassis

62031
3 Ton Jack & Stands Combo
62030 Jack

Built-in bypass device to
protect hydraulic system from
over pumping damage

Heavy duty chassis for increased
strength and durability

Rolled side frame for
increased strength

63030 Jack Stands

Ratchet bar is constructed
with ductile iron for increased
strength and safety

Wide base for added stability

Locking pawl with built-in
counter weight to secure the
ratchet bar at the designated
height

Welded design for maximum
strength & durability

Packed together in single
shipping box for ease of
storage and transportation

Model	Capacity	Min. Height	Max Height	Product Size	G.W.
